

**MEETING AGENDA
ENVIRONMENTAL PROTECTION COMMISSION
WALLACE STATE OFFICE BUILDING
DES MOINES, IOWA
October 21, 1991**

Meeting convenes at 10:00 a.m., Monday, October 21, in the fourth floor conference room.

Public Participation

10:30 a.m.

Appointments:

Wally Taylor (Item #16)
City of Lytton (Item #20-A)
American Meat Protein Corp. (Item #20-B)

1:30 p.m.
2:00 p.m.
2:15 p.m.

1. Approve Agenda.
2. Approve Minutes of September 16, 1991.
3. Director's Report. (Wilson) Information.
4. Budget Request FY 93-94, Review and Approval. (Kuhn) Decision.
5. Continuation of Nonpoint Pollution Control Projects. (Kuhn) Decision.
6. New Nonpoint Pollution Control Project Contracts. (Kuhn) Decision.
7. Landfill Alternative Grant Awards. (Hay) Decision.
8. Iowa State University Contract Amendment. (Hay) Decision.
9. Monthly Reports. (Stokes) Information.

10. Final Rule--Chapter 30, Temporary Air Toxics Fees. (Stokes) Decision.
11. Notice of Intended Action--Chapter 61, Water Quality Standards (Ames). (Stokes) Decision.
12. State Revolving Fund - Intended Use Plan (FY 92). (Stokes) Information.

13. ~~Proposed Rule--Chapters 60 and 64, Stormwater Discharge Permits.~~ (Stokes) Information.

14. Amendment to Chapter 136, Underground Storage Tanks New Financial Responsibility Date for Local Governments. (Stokes) Information.
15. Notice of Intended Action--Chapter 102, Financial Assurance Mechanisms for Closure and Postclosure Costs at Sanitary Disposal Projects. (Stokes) Decision.

EPC Agenda - Page 2

- 16. Petition for Rulemaking - Air Toxics. (Combs) Decision.**
- 17. Ed Cain - Channel Change. (Combs) Decision.**
- 18. Proposed Contested Case Decision--IBP, Inc., Columbus Junction. (Combs) Decision.**
- 19. Proposed Contested Case Decision--P & B Rental Corp., et al. (Combs) Decision.**
- 19A - Proposed Contested Case Decision-- John W. Yotter (Combs) Decision.*
- 20. Referrals to the Attorney General. (Combs) Decision**
 - (a) City of Lytton
 - (b) American Meat Protein Corporation (Lytton)
 - (c) Jim Braun (Franklin County)
- 21. 1992 Legislation Package. (Combs) Decision.**
- 22. General Discussion.**
- 23. Address Items for Next Meeting.**

Environmental Protection Commission Minutes

OCTOBER 1991 COMMISSION MEETING

The meeting of the Environmental Protection Commission was held in the Wallace State Office Building, Des Moines, Iowa, convening at 10:00 a.m. on October 21, 1991.

MEMBERS PRESENT

William Ehm, Richard Hartsuck, Rozanne King, Charlotte Mohr, Margaret Prah, Nancy Lee Siebenmann, and Clark Yeager.

MEMBERS ABSENT

Gary Priebe

ADOPTION OF AGENDA

The following items were added to the agenda:

Item #19A - Proposed Contested Case Decision--John W. Yotter

It was requested that the appointment time for City of Lytton and American Meat Protein Corporation be switched.

Motion was made by Charlotte Mohr to approve the agenda as amended. Seconded by Rozanne King. Motion carried unanimously.

ADOPTION OF MINUTES

Motion was made by William Ehm to approve the meeting minutes of September 16, 1991, as presented. Seconded by Clark Yeager. Motion carried unanimously.

DIRECTOR'S REPORT

Larry Wilson, Director, informed the Commission that Allan Stokes has been asked, by the U.S. EPA, to participate in an advisory board meeting to establish a National Environmental Training Institute. He noted that only certain states were invited to participate and it is a tribute to Mr. Stokes' ability and reputation with EPA to serve in that capacity.

Charlotte Mohr commented that Allan Stokes and Al Farris gave an excellent presentation to an intergovernmental meeting recently held at Calamus, Iowa.

BUDGET REQUEST FY 93-94, REVIEW AND APPROVAL

Stan Kuhn, Division Administrator, Administrative Services Division, presented the following item.

Attached is a schedule of proposed departmentwide decision package priorities. Also indicated are the division priorities. The separate sources of funds and related FTE for each package are shown.

The staff is recommending that the EPC approve the budget request as outlined by the decision package priority list. As discussed last month, the DNR budget request continues operations and capitals at the same level as the FY92 appropriation, less the 3.25% across-the-board reduction and the Reduction-In-Force positions and dollars. Some adjustments are being made to accommodate the indirect cost charge-back mandated by the 1991 General Assembly.

Summary financial schedules for each division, special program, and department-wide, are attached along with an explanatory memo.

The EPC has the responsibility, under current statutes, to approve the budget request relating to Environmental Protection, Waste Management, related programs, and support functions. This item was also presented to the NRC on 10/4 for their approval. Approval of the EPC is requested.

(Priority list and financial schedules are shown on the following 14 pages)

Mr. Kuhn gave a detailed explanation of the budget.

Discussion followed regarding various aspects of the budget, particularly the priority listings.

Motion was made by Margaret Prahl to approve the FY 93-94 Budget Request. Seconded by William Ehm. Motion carried unanimously.

PUBLIC PARTICIPATION

Richard Vander Horn

Richard Vander Horn, Executive Secretary, Iowa Division of Izaak Walton League, presented the following written statement:

"Thank you Mr. Chairman, members of the commission and Mr. Larry Wilson, Director of the Department of Natural Resources. My name is Richard Vander Horn and I am the Executive Secretary of the Iowa Division, Izaak Walton League of America.

I come before this commission this morning to speak to you about stream straightening in Iowa. As a result of a stream straightening case in Clinton County and probably other stream straightenings unknown at present I wish to message to you our concerns, you know as I know Iowa has statutes and laws to protect our streams and rivers and bring to the attention of those persons directly or indirectly violating those statutes and laws.

If Iowa is to protect its streams and rivers with adequate fisheries habitat, wildlife habitat, plant habitat and control any possible environmental damage downstream, it must require compliance with present violators and/or other concerns or conditions that may be implemented by the Commission.

When spring runoff and heavy rains create abnormal flows of streams and rivers we can view a large soil sedimentation being deposited into streams and rivers downstream and also some flooding.

Our present law was not created to completely eliminate all problems associated with abnormal flows but to minimize damage created by such.

When statutes and/or laws are created they are done so to protect the rights of the accused and others who may be directly or indirectly involved. This I might add is a case in question which includes the DNR and other agency people.

I am tired of hearing agencies and/or individuals within our Iowa agencies being made out to be the bad guys when they only implement the letter of the law and any compromises they are allowed.

I have a strong personal feeling about the environment, and the condition of my environment depends directly on me. If I love it, and I use it and I protect it, it will be there each day of my life for my enjoyment. I've been a member of the Izaak Walton League for over 30 years and am now very proud to be an employee of the organization.

Iowa is blessed with several good conservation and environmental organizations working to one basic end and that is that every Iowa citizen has an environment that they deserve.

I close by saying all of your decisions are important. If you or any Iowa agency allow ignorance of the law, emotional conditions, or any other conditions to circumvent our laws or our statutes, you are sending a very poor message to the Iowa people.

You are a part of a great agency, you are the selected groups to help keep Iowa environmentally sound.

Thank You - Richard Vander Horn."

Margaret Prah1 asked Mr. Vander Horn if he supports the action by the department against Ed Cain.

Mr. Vander Horn stated that his organization opposes any circumventing of the law which would lessen the decision made by the Commission regarding that violation.

John Moreland

John Moreland, representing Environmental Advocates, Inc. of Iowa City, presented background on this nonprofit organization and how he became involved in bringing the petition for draft rules on air toxics. He stated that the Toxic Release Inventory of the Community-Right-to-Know-Act basically established the recording requirements of the industries that pass a tonnage threshold for some 300+ industrial air pollutants. Environmental Advocates, in conjunction with other environmental organizations, compiled and released the Toxic Release Inventory for 1988 and 1989. The 1989 data found Iowa to be 23rd in the country for release of hazardous air pollutants. Mr. Moreland stated that the 1990 legislature gave the DNR responsibility for future compilation of the Toxic Release Inventory, and he urged the Commission to develop rules explicitly stating when and who will do this compilation as mandated by law. Mr. Moreland noted that in July 1989, DNR staff promised to hold a public hearing regarding Shellar Globe's application for modifying their emissions permit. The hearing never took place, resulting in Shellar Globe operating illegally for about a year. He stated that in the Fall of 1989, the Air Toxics Advisory Committee, at the direction of

the EPC, reviewed rules drafted by DNR staff and they urged the Commission to adopt the rules. In Spring of 1990, the Commission tabled the rules in lieu of the Clean Air Act and the stringency clause. Mr. Moreland stated that the 1991 legislative session brought forth HF 683, giving the department the authority to collect tonnage fees and develop a permit program. On Aug 1, 1991, Environmental Advocates filed a petition for rulemaking. Mr. Moreland noted that on September 19, 1991, representatives from Environmental Advocates had a hearing with staff and learned that DNR had quit screening for air toxics. He stated that this situation is fully unacceptable and he asked the Commission to also find it unacceptable and do something about it.

Chairperson Hartsuck stated that he was a member of the Air Toxics Advisory Committee and he would like to clarify that they did not urge the Commission to adopt the rules. The committee was assigned the task of drafting rules to submit to the Commission for their approval.

Nathan Shepard

Nathan Shepard, Iowa Citizen Action Network, addressed the Commission stating that total tonnage for air releases for 1989 was 40 million pounds. He noted that his group has been closely watching the petition for rulemaking in regards to air toxics. Mr. Shepard related that the Iowa Citizen Action Network, along with other groups, worked hard to pass the Toxic Pollution Prevention Bill (HF 683), as they believed there was a disproportionate amount of resources committed toward preventive activities versus those focused on control activities after pollutants have been created. He noted that the \$50,000 from the Temporary Toxics Fee designated for the pollution prevention program is more than likely the extent of commitment from the state of Iowa for pollution prevention activities. Mr. Shepard stated that the Citizen Action Network is very discouraged to see that the air toxics screening process within the DNR's permit process has been suspended. He compared the number of employees in the Air Quality Section with the number in the states of Kansas and Washington and related that Iowa has two thirds less employees than those states. He added that it does not speak well of our state program. Mr. Shepard stated that none of the 240 permit applications awaiting review are going to be screened for air toxics now, and he finds that totally unacceptable. He asked the Commission to do the prudent thing and adopt the draft rules as proposed. He also asked the Commission to take some sort of position with regard to repeal of the stringency clause so that standards can be adopted that are fit for Iowa.

Joe Bolkom

Joe Bolkom, Sierra Club representative, distributed a report prepared by the Iowa Chapter of the Sierra Club regarding industrial pollution in Iowa. Mr. Bolkom expressed concerns as to where Iowa is going with air quality, particularly as it relates

to the recent decision to discontinue screening of applications for air quality construction permits for air toxics. He stated that he was on the Air Toxics Advisory Committee that reviewed the proposed draft rules on air toxics. Mr. Bolckcom noted that for the past two years he has worked for the Sierra Club doing public education on the impact of the Clean Air Act and has spent several hundred hours researching air quality issues. He stated that the Sierra Club believes that Iowa has failed miserably in developing an informed approach to addressing toxic air pollution issues. Iowa has taken a huge step backwards in the department's decision to quit screening air toxic construction permits. Mr. Bolckcom stated that since 1979, this Commission has had the responsibility for developing rules to control hazardous air pollutants, yet neither this Commission or it's predecessor has acted to do so, nor has the governor or past legislatures. He asked how much longer people will have to wait to have an air program that protects both public health and the environment. He added that Iowans are tired of waiting and want the Commission's attention to this problem now, particularly in the communities of Davenport, Knoxville, Clinton, Muscatine, Waterloo, Des Moines and others where there is significant exposure to toxic air pollutants. Mr. Bolckcom stated that he believes the Clean Air Act is more package than product and will take 10 times longer than if the state developed their own product. EPA has set standards for only 13 hazardous air pollutants and will try to develop technology based standards for 189 pollutants over the next ten years. He related that health based risks will not be looked at for nine years. In conclusion, Mr. Bolckcom stated that "given the choice between EPA who is trying to act, and this body that does not appear to have a commitment to act, perhaps EPA is our salvation." He added that EPA could do no worse in operating Iowa's air toxics program than what is presently being done.

Chairperson Hartsuck stated that one of the nicest luxuries in life is to be pure on any question.....pure in business and economic development and pure in environment. He stressed that it is a more difficult task to try to optimize those factors.

CONTINUATION OF NONPOINT POLLUTION CONTROL PROJECTS

Stan Kuhn, Division Administrator, Administrative Services Division, presented the following item.

Commission approval is requested for three contracts, two with the Division of Soil Conservation, Iowa Department of Agriculture and Land Stewardship, and the other with Iowa State University, to continue Section 319 funding for projects DNR first funded in FY91. These are:

DIVISION OF SOIL CONSERVATION

Floyd County: A five year project to protect and improve groundwaters in the Devonian aquifer in Floyd County. Project activities include: inventory and evaluation of sinkholes and agricultural drainage wells; development and implementation of groundwater management plans (including fertilizer & pesticide management programs) for participating farms; completion of a pesticide container recycling project; establishment of sinkhole buffer strips; and closure and development of alternate outlets for agricultural drainage wells.

The contract will provide \$19,560 for Year Two of the project, and the Division of Soil Conservation will provide \$54,000. Total Year Two project costs are \$73,560.

Clarke County: A five year project to reduce movement of sediment, nutrients, and pesticides into West Lake in order to protect and improve the lake's value as a public water supply, fisheries, wildlife and recreational resource. Project activities include use of no-till or other conservation tillage practices, nutrient and pesticide management, terracing, and water quality monitoring.

The contract will provide \$20,412 for Year Two of the project, and the Division of Soil Conservation will provide \$104,588. Total Year Two project costs are \$125,000.

IOWA STATE UNIVERSITY

A three-year project to evaluate and demonstrate the effectiveness of using trees and other permanent vegetation in riparian zones to intercept soil and agricultural chemicals, stabilize small streams, improve aquatic environments and provide wildlife habitat. Activities include: tree and grass planting; collecting soil, geohydrology, and stream condition information; water quality monitoring, and a public information program.

The contract will provide \$51,216 for Years Two and Three of the project, and the ISU Leopold Center will provide an equivalent amount. Total Year Two and Year Three project costs are \$102,432.

Mr. Kuhn gave a brief explanation of the continued project contracts.

Motion was made by Margaret Prah1 to approve continuation of Nonpoint Pollution Control Project contracts with Iowa State University and Division of Soil Conservation. Seconded by Charlotte Mohr. Motion carried unanimously.

NEW NONPOINT POLLUTION CONTROL PROJECT CONTRACTS

Stan Kuhn, Division Administrator, Administrative Services Division, presented the following item.

Commission approval is requested for three contracts to provide EPA Section 319 funding to nonpoint pollution control projects. DNR has not provided funding to these projects in the past. The projects are:

SOIL CONSERVATION SERVICE (SCS): A project to support full time engineering and technician positions in the Iowa SCS, with these positions being used to: develop policies, procedures, and design criteria for the design and construction of animal waste control facilities; train SCS field staff in waste control facility design; and provide technical assistance to Iowa livestock producers in developing animal waste management plans and control facilities.

The contract will provide \$148,500 to cover the salary, fringe benefit, moving expense, and job-related travel costs of the engineering position for a two-year period. SCS will provide \$107,750 to cover the costs of the technician position for this same period.

IOWA STATE UNIVERSITY (ISU): A one-year project to develop, print, and distribute a booklet which: reviews Iowa's nonpoint source pollution problems and agriculture's contribution to these problems; identifies and discusses agricultural Best Management Practices that are effective in controlling sediment, nutrients, pesticides, and animal wastes; and identifies agencies and programs that can assist in BMP implementation. Widespread distribution of the booklet is planned, with copies going to Iowa farmers, farm organizations, and agribusinesses.

The contract will provide \$55,000 to support development, printing, and distribution of the booklet. ISU will contribute \$19,600.

SAC COUNTY SOIL & WATER CONSERVATION DISTRICT (SWCD): A three-year project to carry out an Integrated Crop Management (ICM) Program in the Black Hawk Lake Watershed, Sac County. The ICM program will be carried out by staff hired to assist farmers in: crop enterprise record keeping, soil testing, crop scouting, and determining appropriate fertilizer, pesticide, and animal waste application rates and practices. The ICM program will complement the ongoing EPA Clean Lakes Program project for Black Hawk Lake, which includes implementation of watershed erosion controls, lake dredging, and water quality monitoring.

The contract will provide \$15,000 per year for each of the first two years of the ICM project, with DSC providing an equivalent

amount. After two years, fees paid by participating farmers are expected to make the ICM program self supporting.

Mr. Kuhn gave a brief explanation of the new project contracts.

Motion was made by Margaret Prahl to approve contracts for new Nonpoint Pollution Control Projects with the Soil Conservation Service, Iowa State University, and Sac County Soil & Water Conservation District. Seconded by Nancy Lee Siebenmann. Motion carried unanimously.

LANDFILL ALTERNATIVE GRANT AWARDS

Teresa Hay, Division Administrator, Waste Management Authority Division, presented the following items.

Eighteen grant applications were selected for funding from the round of applications submitted the first Monday in June. Two applicants decided not to accept the grant funds. Three grants are awards of less than \$25,000. Five of the thirteen grants that require Commission approval are attached. The Commission is requested to approve the five contracts at this time. The remaining contracts that require Commission approval will be brought to future Commission meetings.

- 1) Bremer County and the City of Waverly \$230,450

This project will be a joint effort for waste reduction and recycling activities, including curbside pick-up of recyclables in Waverly, and drop-off collection in all of the other cities in the county. Processing will take place at a county facility and will utilize vocational clients.

- 2) Organic Technologies \$246,000

This grant will be used to construct a regional yard waste collection and composting facility for Madison, Warren, Dallas and Polk counties. The facility will be located in Dallas county. The business owner is Myron Hirschman.

- 3) Iowa State University \$33,400

ISU Facilities Planning and Management will use this grant for site preparation, building and equipment to collect and compost yard waste from ISU buildings and grounds, and will reuse the product for grounds application.

- 4) Dordt College \$28,400

October 1991

Environmental Protection Commission Minutes

Dordt will be purchasing pollution control equipment to enable the Dordt burner in Sioux Center to burn dRDF without violating emission standards.

5) Nishna Sanitary Services

\$200,000

This grant will be used to build, equip and operate a recycling center to serve Montgomery, Page, Fremont and Mills counties. The owner of the business is Phil Mellot.

(Scope of Work is shown on the following 13 1/2 pages)

SCOPE OF WORK Bremer County & City of Waverly

- 5.1 The Contractor shall implement a program to develop and implement a county-wide recycling program for Bremer County, Iowa.
- 5.2 The Contractor, in cooperation with cities covered by the project, shall implement an education program to educate residents and business operators on how to take maximum advantage of the Contractor's waste reduction and recycling services.
- 5.3 The Contractor shall investigate the market for recyclable materials and will communicate markets and market development activities to the Department through monthly and final reports, including information on the amounts of various recyclables collected, participation rates, capture rates of recyclable materials, and total volume reduction information..
- 5.4 The Contractor shall contact the Environmental Protection Division of the Department to determine if a permit is necessary from the Department. If a permit is required, the Contractor shall prepare detailed plans for the Project. The Contractor will submit plans and specifications for the Project to the Environmental Protection Division of the Department and shall receive approval from the Department before operation of the Project begins.

If the Department determines that a permit is not necessary, a written confirmation from the Department must be provided.

- 5.5 The Contractor shall purchase any piece of equipment specified in the plans costing over \$10,000 on a competitive basis. The Department shall fund the purchase of equipment and buildings only after the Contractor documents that items 5.2 and 5.3 have been addressed and receives approval from the Department.

The purchase of equipment will include a local cost share of the actual purchase price of the equipment as identified in Appendix A, Budget. The title of the property purchased by the Contractor shall remain vested with the owner of the Project. In the event that the Project fails and any equipment is sold for up to five years after the end of the contract, the Department shall be paid a percentage of the sale price equal to the percentage of grant money used to purchase the property.

- 5.6 The Contractor shall submit monthly reports on the Project. The reports are due on the 15th of every month. The monthly report shall discuss the status of the project and shall include a monthly update of the information required in the final report.
- 5.7 The Contractor shall develop a pictorial history via slides of the Project complete with data on project development from early initiation through construction, start-up, and contract completion necessary for conferences, trade journals, and other sources to disseminate the results of the project. This pictorial history shall be submitted with the final report. The Contractor shall conduct at least one media-notified open house after the Project is operational and will encourage visits at other times on a scheduled basis.
- 5.8 The Contractor shall submit a final report on the Project. The final report will include:
- 1) Information on the amount of material handled, its final disposition, markets and the other specifics outlines in sections 5.1, 5.2, 5.3, 5.4, 5.5, and 5.6.
 - 2) The environmental impact of the Project.
 - 3) Assessment of the viability of conducting this type of project in other communities, counties and regions within the State of Iowa.
 - 4) Details on all aspects of the Project during the term of the contract.
-
-

ARTICLE V. SCOPE OF WORK - Organic Technologies

- 5.1 The Contractor shall provide an economical and environmentally acceptable alternative to open dumping and open burning through composting yard waste from the following six-county area: Warren, Polk, Madison, Marion, Clarke, Dallas.
- 5.2 The Contractor shall promote and finalize agreements with communities, counties and private businesses to provide required services.
- 5.3 The Contractor shall market and promote the use of finished compost.
- 5.4 The Contractor shall contact the Environmental Protection Division of the Department to determine if a permit is necessary from the Department. If a permit is required, the Contractor shall prepare detailed plans for the Project. The Contractor will submit plans and specifications for the Project to the Environmental Protection Division of the Department and shall receive approval from the Department before operation of the Project begins.

If the Department determines that a permit is not necessary, a written confirmation from the Department must be provided.

- 5.5 The Contractor shall purchase any piece of equipment specified in the plans costing over \$10,000 on a competitive basis. The Department shall fund the purchase of equipment and buildings only after the Contractor documents that items 5.2 and 5.3 have been addressed and receives approval from the Department.

The purchase of equipment will include a local cost share of the actual purchase price of the equipment as identified in Appendix A, Budget. The title of the property purchased by the Contractor shall remain vested with the owner of the Project. In the event that the Project fails and any equipment is sold for up to five years after the end of the contract, the Department shall be paid a percentage of the sale price equal to the percentage of grant money used to purchase the property.

- 5.6 The Contractor shall submit monthly reports on the Project. The reports are due on the 15th of every month. The monthly report shall discuss the status of the project and shall include a monthly update of the information required in the final report.

- 5.7 The Contractor shall develop a pictorial history via slides of the Project complete with data on project development from early initiation through construction, start-up, and contract completion necessary for conferences, trade journals, and other sources to disseminate the results of the project. This pictorial history shall be submitted with the final report. The Contractor shall conduct at least one media-notified open house after the Project is operational and will encourage visits at other times on a scheduled basis.
- 5.8 The Contractor shall submit a final report on the Project. The final report will include:
- 1) Information on the amount of yard waste collected from each of the six counties during the term of this Contract, the name and address of the markets utilized in the Project, the quantity of material sold to these markets, citizen participation rates, operation and maintenance costs, waste diverted from the landfill and future expectations in these areas.
 - 2) The environmental impact of the Project.
 - 3) Assessment of the viability of conducting this type of project in other communities, counties and regions within the State of Iowa.
 - 4) Details on all aspects of the Project during the term of the contract.

*\$10,000 allocated in SBA loan for site preparation.

ARTICLE V. SCOPE OF WORK - ISU Yard Waste Composting

- 5.1 The Contractor shall create a permanent program for the composting and reuse of organic yard wastes created by the grounds and academic departments on the Iowa State University campus.
- 5.2 The Contractor will create a resource to be used by the University Civil Engineering program, the University Department of Horticulture, as well as the University Horticulture Extension Department for both teaching and future research.
- 5.3 The Contractor shall establish a specific education program dealing with composting. The program will include promotional and educational materials that will be made available to Iowa communities through workshops or other strategies.
- 5.4 The Contractor shall contact the Environmental Protection Division of the Department to determine if a permit is necessary from the Department. If a permit is required, the Contractor shall prepare detailed plans for the Project. The Contractor will submit plans and specifications for the Project to the Environmental Protection Division of the Department and shall receive approval from the Department before operation of the Project begins.

If the Department determines that a permit is not necessary, a written confirmation from the Department must be provided.

- 5.5 The Contractor shall purchase any piece of equipment specified in the plans costing over \$10,000 on a competitive basis. The Department shall fund the purchase of equipment and buildings only after the Contractor documents that items 5.2 and 5.3 have been addressed and receives approval from the Department.

The purchase of equipment will include a local cost share of the actual purchase price of the equipment as identified in Appendix A, Budget. The title of the property purchased by the Contractor shall remain vested with the owner of the Project. In the event that the Project fails and any equipment is sold for up to five years after the end of the contract, the Department shall be paid a percentage of the sale price equal to the percentage of grant money used to purchase the property.

- 5.6 The Contractor shall submit monthly reports on the

Project. The reports are due on the 15th of every month. The monthly report shall discuss the status of the project and shall include a monthly update of the information required in the final report.

5.7 The Contractor shall develop a pictorial history via slides of the Project complete with data on project development from early initiation through construction, start-up, and contract completion necessary for conferences, trade journals, and other sources to disseminate the results of the project. This pictorial history shall be submitted with the final report. The Contractor shall conduct at least one media-notified open house after the Project is operational and will encourage visits at other times on a scheduled basis.

5.8 The Contractor shall submit a final report on the Project. The final report will include:

- 1) Information on the amount of yard waste composted and collected during the term of this Contract, the name and address of the markets utilized in the Project, the quantity of material sold or given to these markets, participation rates, operation and maintenance costs, waste diverted from the landfill and future expectations in these areas.
 - 2) The environmental impact of the Project.
 - 3) Assessment of the viability of conducting this type of project in other communities, counties and regions within the State of Iowa.
 - 4) Details on all aspects of the Project during the term of the contract.

ARTICLE V. SCOPE OF WORK - Dordt College

- 5.1 The Contractor shall purchase or modify equipment to insure the successful operation of their solid fuel system for burning densified refuse derived fuel (dRDF).
- 5.2 The Contractor shall contact the Environmental Protection Division of the Department to determine if a permit is necessary from the Department. If a permit is required, the Contractor shall prepare detailed plans for the Project. The Contractor will submit plans and specifications for the Project to the Environmental Protection Division of the Department and shall receive approval from the Department before operation of the Project begins.

If the Department determines that a permit is not necessary, a written confirmation from the Department must be provided.

- 5.3 The Contractor shall purchase any piece of equipment specified in the plans costing over \$10,000 on a competitive basis. The Department shall fund the purchase of equipment and buildings only after the Contractor documents that items 5.2 and 5.3 have been addressed and receives approval from the Department.

The purchase of equipment will include a local cost share of the actual purchase price of the equipment as identified in Appendix A, Budget. The title of the property purchased by the Contractor shall remain vested with the owner of the Project. In the event that the Project fails and any equipment is sold for up to five years after the end of the contract, the Department shall be paid a percentage of the sale price equal to the percentage of grant money used to purchase the property.

- 5.4 The Contractor shall submit monthly reports on the Project. The reports are due on the 15th of every month. The monthly report shall discuss the status of the project and shall include a monthly update of the information required in the final report.

- 5.5 The Contractor shall develop a pictorial history via slides of the Project complete with data on project development from early initiation through construction, start-up, and contract completion necessary for conferences, trade journals, and other sources to disseminate the results of the project. This pictorial history shall be submitted with the final report. The

Contractor shall conduct at least one media-notified open house after the Project is operational and will encourage visits at other times on a scheduled basis.

5.6 The Contractor shall submit a final report on the Project. The final report will include:

- 1) Information on the amount of dRDF burned during the term of this Contract, information on emissions, specific description of modifications, operation and maintenance costs, waste diverted from the landfill and future expectations in these areas.
- 2) The environmental impact of the Project.
- 3) Assessment of the viability of conducting this type of project in other communities, counties and regions within the State of Iowa.
- 4) Details on all aspects of the Project during the term of the contract.

SCOPE OF WORK Nishna Sanitary Services

- 5.1 The Contractor shall conduct a program to develop and implement a regional recycling center for the SW Iowa counties of Mills Fremonts, Montgomery, and Page and any others that may become part of their solid waste group.
- 5.2 The Contractor, in cooperation with cities covered by the project, shall implement an education program to educate residents and business operators on how to take maximum advantage of the Contractor's waste reduction and recycling services, including programs operated by other waste haulers utilizing the Contractor's landfill.
- 5.3 The Contractor shall investigate the market for recyclable materials and will communicate markets and market development activities to the Department through monthly and final reports, including information on the amounts of various recyclables collected, participation rates, capture rates of recyclable materials, and total volume reduction information.
- 5.4 The Contractor will utilize yard waste composting and Minicipal Solid Waste (MSW) composting to handle organic compostable materials that are not recyclable, as determined by the DNR, in order to further reduce the waste stream entering the landfill. the Contractor will communicate information on the amount and character of materials being handled in this fashion through monthly and final reports.
- 5.5 The Contractor shall develop and implement a program to compost appropriate non-recyclable organic materials in compliance with existing Department rules. The Contractor shall maintain records on the amount and composition of the composted waste stream This information will be relayed to the Department through monthly and final reports. The implementation of this portion of the solid waste management program shall not be used to circumvent legitimate recycling opportunities or sincere investigations of markets for appropriate materials.
- 5.6 The Contractor shall contact the Environmental Protection Division of the Department to determine if a permit is necessary from the Department. If a permit is required, the Contractor shall prepare detailed plans for the Project. The Contractor will submit plans and specifications for the Project to the Environmental Protection Division of the Department and shall receive approval from the Department before operation of the Project begins.

If the Department determines that a permit is not necessary, a written confirmation from the Department must be provided.

- 5.7 The Contractor shall purchase any piece of equipment specified in the plans costing over \$10,000 on a competitive basis. The Department shall fund the purchase of equipment and buildings only after the Contractor documents that items 5.2 and 5.3 have been addressed and receives approval from the Department.

The purchase of equipment will include a local cost share of the actual purchase price of the equipment as identified in Appendix A, Budget. The title of the property purchased by the Contractor shall remain vested with the owner of the Project. In the event that the Project fails and any equipment is sold for up to five years after the end of the contract, the Department shall be paid a percentage of the sale price equal to the percentage of grant money used to purchase the property.

- 5.8 The Contractor shall submit monthly reports on the Project. The reports are due on the 15th of every month. The monthly report shall discuss the status of the project and shall include a monthly update of the information required in the final report.

- 5.9 The Contractor shall develop a pictorial history via slides of the Project complete with data on project development from early initiation through construction, start-up, and contract completion necessary for conferences, trade journals, and other sources to disseminate the results of the project. This pictorial history shall be submitted with the final report. The Contractor shall conduct at least one media-notified open house after the Project is operational and will encourage visits at other times on a scheduled basis.

- 5.10 The Contractor shall submit a final report on the Project. The final report will include:

-
- 1) Information on the amount of material handled, its final disposition, markets and the other specifics outlined in sections 5.1, 5.2, 5.3, 5.4, 5.5, and 5.6.
 - 2) The environmental impact of the Project.
 - 3) Assessment of the viability of conducting this type of project in other communities, counties and regions within the State of Iowa.
 - 4) Details on all aspects of the Project during the

TOTALS	\$200,000	\$290,000	\$490,000

Ms. Hay pointed out an error in the budget for Bremer County and distributed a new page reflecting the correction.

Discussion followed.

Motion was made by Margaret Prah1 to approve the Landfill Alternative Grants for Bremer County and the City of Waverly, Organic Technologies, Iowa State University, Dordt College, and Nishna Sanitary Services. Seconded by Clark Yeager. Motion carried unanimously.

IOWA STATE UNIVERSITY CONTRACT AMENDMENT

Teresa Hay, Division Administrator, Waste Management Authority Division, presented the following item.

Iowa State University presently has an approved, one-year contract with DNR, for \$99,655, to develop, demonstrate, and implement a regionalized marketing and transportation data base and communication network for recycling materials from the municipal and industrial waste stream. The U. S. Environmental Protection Agency provided funding to DNR for the project.

Year One of the project has been successful, and U.S. EPA has made an additional \$99,365 available for project expansion and refinement. The Commission is requested to approve the attached

amendment, which extends the contract an additional year and incorporates the additional \$99,365. Year Two activities will include refining the software, field testing the project, and expanding the project to include more detailed end-use market information, and to add six states to the market information system.

The system is known as the Mid-America Recycling and Transportation Information Network (MARTIN). Anyone who has a computer with modem or a touchtone phone can call the system to find out what recycling markets are available in each of 15 states for seven types of materials. The materials include paper, ferrous metal, plastics, glass, tires, automobile batteries, and waste oil. EPA has recognized this program at both the regional and national level as a significant development that may well provide the national model for recycling networks via computer. To that end EPA is providing the DNR with a grant to sponsor a national roundtable meeting in Des Moines to bring together people developing similar systems in other states. The Iowa project is believed to be the most sophisticated and largest in the nation at this point.

(Scope of Work is shown on the following 1½ pages)

AMENDED SCOPE OF WORK: ISU Communications Network

Year 2 Activities are added to Article V, Scope of Work, as follows:

8. Include the following additional states in the construction of the recycling database: Arkansas, Oklahoma, Colorado, Wyoming, Kentucky, and Tennessee.
 9. Develop recycling network capabilities at the following demonstration communities: Sheldon, Iowa; Manhattan, Kansas; Lawrence, Kansas; Columbia, Missouri; Rolla, Missouri; Beatrice, Nebraska; Chadron, Nebraska.
 10. Locate major processors of secondary materials and dealers in these materials in the 15-state region identified in this contract.
 11. Develop transportation options and price range data for the 15-state region, to connect all demonstration sites and major marketing points for each of the seven materials identified in the contract. This aspect of the database will include modes, names of routes, and names of carriers.
 12. Add quality specification data to the database, based on information supplied by processors and dealers in the seven specified materials and information acquired during the surveys conducted in 1990-91.
 13. Continue to develop user protection, to avert potential disruption of the system through unwanted actions by users of the system or through natural causes.
 14. Upgrade user access through the use of DECTalk. Specifically, the rate of speech for certain elements in the data bank will be adjusted and provisions for suggestions from users and for requests for assistance will be incorporated into the user menu.
-

AMENDED BUDGET: ISU Communications Network

The Budget for Communications Network Contract is replaced by the following:

BUDGET FOR COMMUNICATIONS NETWORK CONTRACT

<u>ITEM</u>	<u>EPA</u>	<u>ISU</u>
Salaries and Wages	\$ 116,598	\$ 52,585
Fringe Benefits	13,822	12,514
Equipment	16,189	
Materials & Supplies	14,390	
Travel	14,954	
Computer Supplies	1,764	
Publication/Report Costs	7,730	
TOTAL DIRECT COSTS	185,447	65,099
Indirect Costs		
8% of mod. total dir. costs	13,573	
40% of contributed costs		29,280
32% remaining indirect		49,943
TOTAL DIRECT & INDIRECT COSTS	199,020	144,322

Ms. Hay explained the contract amendments and funding for same.

Motion was made by Nancy Lee Siebenmann to approve a contract amendment with Iowa State University at a cost of \$99,655, to implement a system known as Mid-America Recycling and Transportation Information Network. Seconded by Rozanne King. Motion carried unanimously.

Charlotte Mohr asked why RoseBar has not received all of their grant money.

Ms. Hay responded that final payment was just recently approved as staff was waiting for required information from RoseBar.

Director Wilson reminded the Commission that several months ago one of the representatives from Rosebar appeared before them expressing concern about a clause in their contract requiring that the public be allowed to see demonstrations at the plant. He added that the recommendation at that time was for RoseBar to submit a schedule of when visitation would be allowed, and the department has not received the schedule. Mr. Wilson related that they need to clearly set aside a block of time each week to allow the public in, as they received public dollars and it is a public project that should be shared.

MONTHLY REPORTS

Darrell McAllister, Bureau Chief, Surface and Groundwater Protection Bureau, presented the following item. presented the following item.

The following monthly reports are enclosed with the agenda for the Commission's information.

1. Rulemaking Status Report
2. Variance Report
3. Hazardous Substance/Emergency Response Report
4. Enforcement Status Report
5. Contested Case Status Report

Members of the department will be present to expand upon these reports and answer questions.

TOPIC: Report of Hazardous Conditions

During the period September 1, 1991 through September 30, 1991, reports of 56 hazardous conditions were forwarded to the Central Office. Two incidents are highlighted below. A general summary and count by field office is attached. These do not include releases from underground storage tanks, which are reported separately.

Date Reported and County	Description: Material, Amount, Date of Incident, Cause, Location, Impact	Responsible Party	Response and Corrective Actions
--------------------------	--	-------------------	---------------------------------

09/01/91 Polk	The saddle tanks on 3 semis were vandalized on Sept 1, 1991. Approximately 200 gallons of diesel fuel spilled onto the soil at the Alter Trading Company in Des Moines. No waterways were impacted by the spill.	Eldon Reed 1824 DeWolf Street Des Moines, IA	Mr. Reed applied absorbant material to the spill. The contaminated soil was overexcavated and land applied at the Alter Trading Company.
09/16/91 Warren	A fuel line cracked at an electric generating plant releasing 80 gallons of fuel oil into a storm sewer on September 16, 1991. No environmental impacts to surface waters were observed.	Indianola Mun. Util. Indianola, IA	The drainage ditch was dammed and absorbant booms placed at the outfall of the storm sewer. The storm sewer was then flushed so the fuel oil could be collected in the drainage ditch and absorbed with additional absorbant pads.
